

BELT
ONLINE

the best way to
practise your English

BELT Online is the ideal companion for the English language learner and a valuable supplement to any English language teaching course.

the best way to
practise your English

at a glance

Covers all the essential areas of foreign language acquisition: reading, listening, speaking, writing, grammar, vocabulary and pronunciation.

Introduces and develops the English language according to a spiral, topic-based syllabus where meaning, grammar, and communicative purposes are woven together.

Presents language in a context that can and should be linked with the lives and experiences of the learners and even expanded on.

A wide range of exciting activities
for three Kindergarten levels.

beltPrimary

6 levels from early Beginners
to Pre-Intermediate.

It is specifically designed for young learners learning English as a foreign or second language and it is intended to be used in schools worldwide.

syllabus

BELT Online material is based on a well-organised syllabus and can be used alongside **any** ELT coursebook used in the classroom.

The content and the activities included in the program take the individual needs and interests of students at this age group into account and lead to correct usage and understanding of the language.

educational technology

Decades of experience and expertise enable Binary Logic to utilise advances in educational technology and deliver quality solutions that drive student achievement.

Technology-based teaching and learning are integral parts of education today. Binary Logic's unique approach to a blended learning environment is field-proven by the huge success of Belt Study System and BELT Online in many countries around the world.

beltSuccess

5 levels from early Beginners to Upper-Intermediate.

It is specifically designed for teenagers and adults learning English as a foreign or second language and it is intended to be used in educational institutions and training centres worldwide.

beltExams

Practice tests for B2 to C2 levels according to the guidelines of the Common European Framework.

Benefits for the school

- > Expands the institution's curriculum to include a new educational philosophy.
- > Updates the institution's educational methods to correspond with current market trends.
- > Improves the institution's image.
- > Consolidates the English teacher's work.
- > Helps students achieve greater success.
- > Offers a value-added service to the students.
- > Helps institutions achieve a higher success rate in exams.

Advantages for the students

- > Students gain greater self-confidence.
- > Students learn self-reliance.
- > Students work at their own pace and can see their results immediately.
- > Students have a more active role compared to the role they have in the classroom.
- > The environment helps them to be extremely productive.
- > Students can work without interruptions and distractions.

Tools for the teacher

- > Online management portal that helps evaluate students.
- > Detailed reporting tools.
- > Certificates of completion.
- > Teacher's guide with Answer Key and listening transcripts.
- > Detailed syllabus for each level and correlation with coursebook.

Our know-how and experience at your service

Having knowledge of all the facets of schools and universities, Binary Logic has developed the most effective educational and technical support services.

Through a network of well-trained consultants, we provide all-year-round support to our customers all over the world.

Binary Logic makes every effort to update and improve BELT Online, according to feedback and suggestions from teachers and students.

At Binary Logic, we treat our customers primarily as educational institutions and secondarily as business organisations. This is the reason why Binary Logic is the most successful company in the field.
